INSTRUCTIONS

WARNING

WARNING: Rev2 Throttle Housing and Tube Revision – Please read before you install!

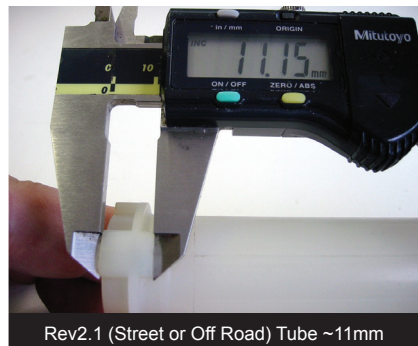

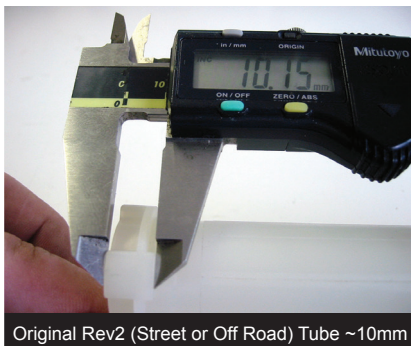

A running change was made to the Rev2 Housing and both the Off Road and Street Tubes to increase the size of the throttle stop for greater durability. **The parts are not interchangeable and incorrect assembly could result in great bodily injury or death.** Each generation has its own set of part numbers:

DESCRIPTION	ORIGINAL REV2 PART #	REVISED REV2.1 PART #
Housing Complete w/ Screws	01-1213	01-1214
Throttle Tube - Street	01-1215	01-1217
Titan Throttle Tube -Off Road	01-1216	01-1284

None of the other components in the Rev2 assembly have changed.

Identifying your components:

The critical dimension is the width of the throttle stop on the throttle tube:

WARNING: Do not use a Rev 2.1 throttle tube in an older housing. Doing so could cause the throttle to bind and could result in great bodily injury or death. An original Rev2 tube will fit and function in a revised Rev2.1 housing. If you have any questions or concerns about the correct fitment on your throttle assembly, contact Motion Pro. If you have purchased a new Rev2.1 throttle tube and have the old version Rev2 housing, please contact Motion Pro at (650) 594-9600 for a free replacement updated housing.
